Project Title: Evanescence Website

This microsite will have multiple pages that serve as a storytelling device for the history of the band Evanescence. It will go over each of the current members and their backgrounds. It will also cover the different musical projects they've completed and their different influences and styles. I want it to feel mysterious and dark to match their aesthetic. It will have pops of bright colors, and the UI will have movement/animations to mirror their sound. I'm also thinking of having an early 2000s website influence rather than going for a sleek modern look. The page navigation will be at the top or perhaps the left side.

1. **Home Page/Introduction** – Introducing the band with a quick description, brief timeline, and a photo of the members.
2. **History** — A timeline of the band from its formation and through its multitude of projects and musical eras over the decades.
3. **Artistry** — A page detailing their music style, influences, impact, awards, etc.
4. **Members** — All of the current members and a little background about each of them—how they got in the band, what they did before, their interests, contributions, etc.
5. **Discography** — a list of all their albums and EPs, with a description of the concept for each. As well as maybe some notable tracks from each.
6. **Sources** – A list of sources, including the Wikipedia page, as well as other sources for photography, and any other credits that need to be provided.
